## INSTRUCTION MANUAL

Roll and Copy is a learning remote control that requires to set the dip-switches on the back according to the enclosed list.

### 1. Programming

The 1st. Dip-switch enables the learning mode on ON (upwards) after duplication must be placed again on OFF (downwards).

### 2. Duplication of the original remote control

- remove rubber cover behind in order to access dip-switch compartment
- select dip-switch position according to your original remote control
- 1st dip-switch must be "ON" during copy
- Place the 2 remote controls as closed to each other as possible keeping pressed the original key ("button") and afterwards the key selected on your new Roll & Copy
- When the LED of your new Roll & Copy starts flashing wait a few seconds, copying has been successful.

### 3. \*\*IMPORTANT to copy FAAC SLH Blue LED

For this model please repeat from a) to c) then as follows:

- On the FAAC SLH blue LED keep pressed together the 2 keys for a few seconds and release, blue LED must keep on flashing
- place the 2 remote controls closed to each other and press first the key of the FAAC SLH to be copied and afterwards the key of the Roll & Copy, wait that its LED starts flashing and wait a few seconds, then copy process has been done..

### IMPORTANT FAAC SLH :

Please place FAAC SLH below at 90° at about 2 cm from your new Roll & Copy. SLH might require pressing the key many times (1-25 times) closed to the receiver in order to synchronize codes.

If you wish to enter additional remote controls from the Roll & Copy list, repeat operation from a) to e)

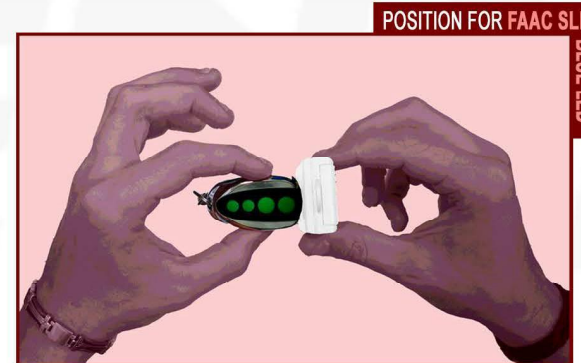

### Working mode remote control Roll & Copy

Place Dip-switch 1 in the OFF position.

### 4. Other functions

**Erasing codes:** Keep pressed the keys 1-2, after LED starts flashing code has been cancelled

**Factory Reset:** Keep pressed the keys 3-4 and wait until LED flashes slowly, wait 10 seconds more until LED flashes fast.
